

TAKING MEDICAL EDUCATION FARTHER

WHAT'S NEW AT FINDAROTATION:

More Clinical Sites
More Automation
Less cost
Less work for YOU!

WHY USE FINDAROTATION?

Mission: To affordably and efficiently pair students and medical professionals for clinical rotations in various specialties across the country at their convenience.

Vision: To empower students to take control of their clinical experience and go farther in their medical career.

Values: Many students, especially those attending smaller or online universities, face challenges securing medical preceptorships in their chosen specialty. FindARotation is the community-driven clinical education platform for students seeking affordable yet varied medical rotations. FAR allows students more financial control and selection in their clinical experience.

FindARotation is a platform by students and physicians for students and physicians to connect and schedule their clinical clerkships, observerships, and clinical shadowing experiences. Unlike rotation agencies that act as a broker, FAR is a platform in which students and preceptors have complete control. This means increased autonomy, increased transparency, and increased affordability.

Helping medical students & training future physicians.
